## EDUCATION

### Tecnologico de Monterrey

*Bachelor of Science in Computer Science*

Guadalajara, Jalisco

Aug. 2020 – May 2024

## EXPERIENCE

### Junior Frontend Engineer

*Mis Fans*

March 2022 – October 2022

Zapopan, Jalisco

- Responsible of creating new components, layouts, and maintaining or update the existing ones
- Build informative pages such as terms and policies, 404 page, and landing page
- Build responsive pages, including payment screens, user profile and user dashboard

## PROJECTS

### Food Bank App | *TypeScript, React.js, Supabase, Tailwind, Expo, GitHub, Git*

August 2022 – October 2022 

- Developed a working mobile app for Jalisco's food bank, to encourage food donations, using React Native in order to be accessible through iOS and Android
- The user receives experience points in order to increase its level, which comes with incentives from the food bank
- The app has a full admin panel in order to approve or remove incoming donations requests
- The app uses Supabase as its database, where the users information is stored, as well as the donations
- In order to handle the user session we use Supabase's auth system

### Personal Website | *React.js, CSS, Vercel, Git*

September 2022 – October 2022  

- Developed my own personal website used to connect my multiple accounts and provide my CV for anyone to download.
- Implemented three.js fiber in order to create a animated background
- The site renders a 3D model on the desktop version which follows the user's cursor
- The website is mobile friendly and can be seen through landscape orientation
- Deployed via Vercel to my domain
- Implemented both Vercel and Google analytics to the page in order to track views
- Using Mixpanel to keep track of the interaction of the user with the website

### Landing Page for MisFans | *TypeScript, Next js., Tailwindcss, Git*

July 2022 – July 2022 

- Created full landing page, featuring animations and mobile user detection
- Component and props based, meaning that the editable elements of the page can be changed in a single .tsx file
- Implemented a moving image carousel to display users profiles and in mobile the tools section
- Added a sticky navbar which changes style as you scroll down the page to keep it visible to the user
- The landing page makes use of "scroll to" buttons on the navbar, so navigation for the user is easier and faster

### Alerts for streamers | *TypeScript, Next js., Supabase, JQuery, Git*

May 2022 – June 2022

- Made an alert system to display messages to streamers
- The alert can be displayed in any streaming platform, such as OBS and Streamlabs
- The streamer can choose when to show the alert, since the alert is different for many products
- The alert shows any of the next options (Subscriptions, donations, greeting requests, questions from donations, and purchase of digital products)
- Includes a lot of customization features, such as duration and GIF

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, Python, C++, Swift

**Developer Tools:** Linux Systems, VIM, CLI, VSCode, Git, Xcode, Docker, GH Pages, Firebase, Vercel

**Frameworks & Libraries:** Tailwindcss, React.js, Next.js, React Native, Three.js, SwiftUI
